

NOTICE OF PEST CONTROL TREATMENT

FOR

East Chambers ISD
1955 State Hwy 124
Winnie, Texas 77665
Contact: Darren Smith, Operations Director
409-296-4175

Application site or area: S.E. McBride Livestock Facility

Date(s) of planned treatment: Daily. We utilize a fly misting system that emits a fine spray that effectively treats the interior of the Livestock Barn. The spray kills insects and breaks their breeding cycle thus lowering future populations. The pesticide that is applied is called Vampyre®. SDS and product labels are available from the IPM Coordinator, Darren Smith.

Time and date when area is safe to reenter: Fly misting system operates on a daily schedule between 10pm and 6am. Reentry between 7:30am -10pm daily

For more information call or contact Darren Smith, Operations Director at 409-296-4175 or Michael Neuman at 409-296-8181.

A Consumer information sheet may be obtained from the management.

Pest control applicators are licensed by the Texas Department of Agriculture. To report a case of suspected misuse of pesticides, or for more information about the laws pertaining to pesticides, contact the Structural Pest Control Service at P.O.Box 12847, Austin, TX, 78711, (512) 305-8250, (888) 232-2567 fax, spcs@TexasAgriculture.gov

For general information about the health effects of pesticides call the National Pesticide Telecommunications Network at 1-800-858-7378.
